### ***PROFESSIONAL BASICS PRACTICE IN CLASSROOM SETTINGS, PRACTICE COURSES***

### **Clinical Biochemistry; automated analyzers 3 ECTS**

Students rehearse using automated analysers in clinical biochemistry and know how to apply their skills in the assessment of biochemical examination results, the errors dependent on the specimen and the reliable function of the analysers. Students know how to work according to the quality manual and the instructions in place. Students can identify the phases of pre-analytics, analytics and post-analytics in clinical biochemistry work.

### **Clinical hematology 2 ECTS**

Hematology I Autumn term: Students rehearse the use of measuring devices in clinical hematology. They can independently prepare a technically high quality blood film and know mature, healthy blood cells. Students know how to work with microscopes independently.

Hematology II Spring term: Students know immature blood cells and can assess the alterations which are seen in the blood count in connection with blood diseases. Students can identify findings in an aberrant blood film.

### **Clinical immunohematology 2 ECTS (only Spring semester)**

Students know how to use the equipment for blood transfusion serology examinations and can, under supervision, carry out basic examinations in blood transfusion serology. Students know how to independently get results for blood type determination analyses.

### **Blood Sampling and Point-of Care-Testing 3 ECTS**

Student can independently carry out the specimen collection for different clinical specimens taking into account the requirements of pre-analytics and occupational safety. Student is able to answer for the safety and well-being of the client during the specimen collection. Student knows how to guide clients and take into account in their guidance the impact of pre-analytical factors on the results of the laboratory examinations. Student knows how to serve clients from other cultures. Student knows how to apply the principles of good service in customer work and in the collaboration with other professional groups.

### **Clinical microbiology 2 ECTS (only Spring semester)**

Students have the basic knowledge of the most common pathogenic microbes, know microbiological identification methods and know the microbiological instruments. Students know the basics of specimen collection for identifying microbes and know the correct procedure for obtaining a specimen from the larynx.

### **Introduction to Biomedical Laboratory Scientist's profession in Finland 1 ECTS**
